Damage caused by hail without net

Damage caused by wasp without net

FRUSTAR systems

reliably protect your culture against the ever-increasing occurrence of extreme weather events.

Constantly updated hail protection components increase safety, extend the life of the equipment and facilitate the handling in the hail protection plantations.

FRUSTAR's technicians and consultants are familiar with a wide variety of situations and specialized in developing the optimum solution for each individual hail protection system for each customer. **FRUSTAR offers** with its business partner's advice and best service on an international level.

- **System Vino**
- **System Roll-up**

Technical Know-
How for decades!

Our systems are the perfect extension of a plant because of the simple construction of the net on the exist rack of the vineyard.

Therefore, we can protect the valuable grapes very easily for damage.
